Other:

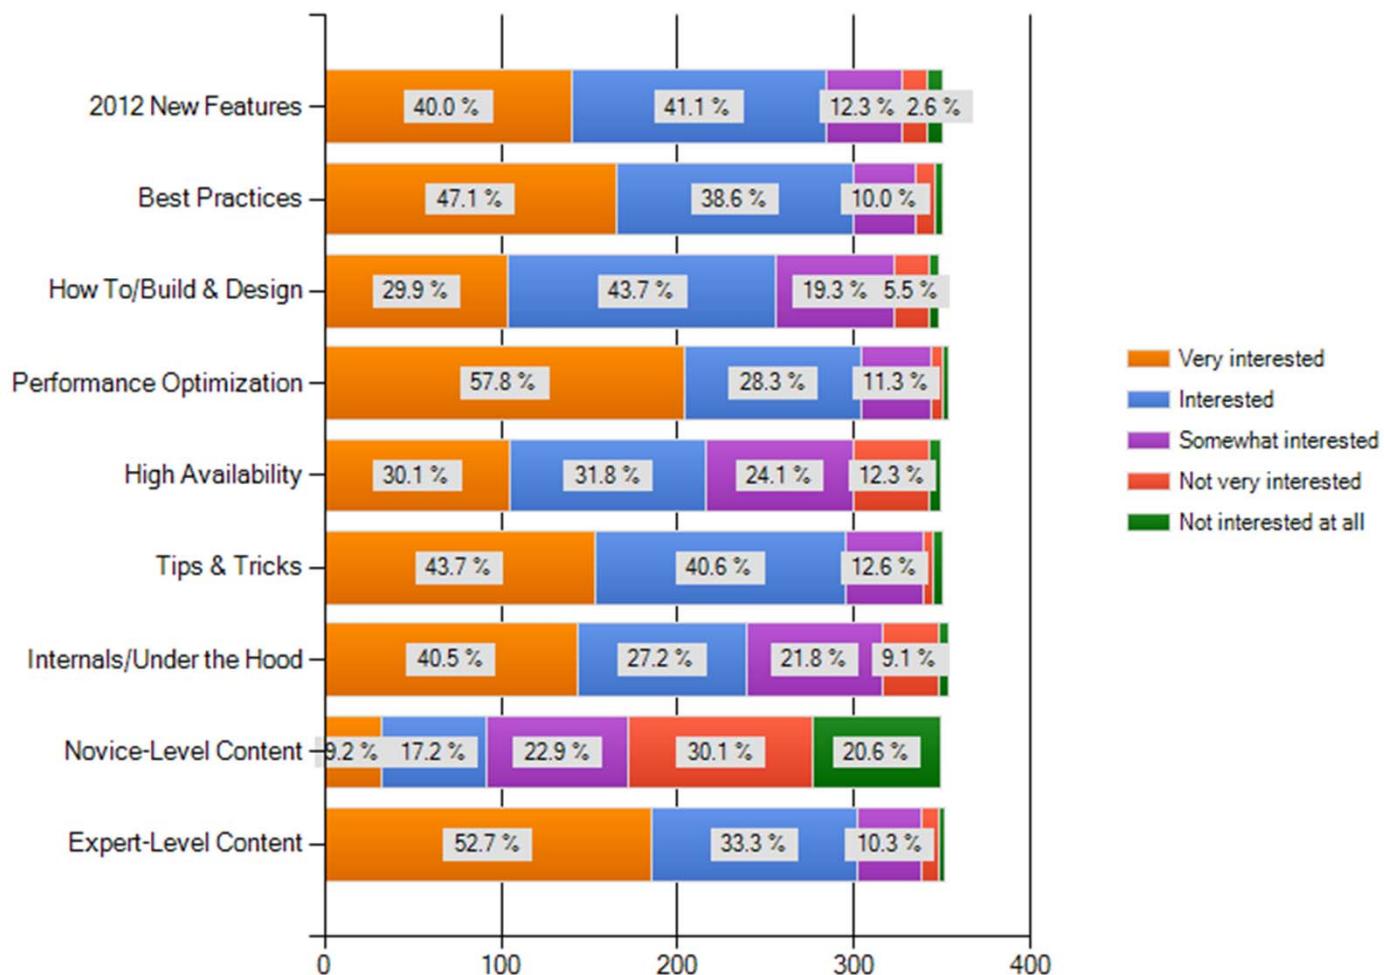

- * An MDX Guru
- * Deep dive from Microsoft on architecture of TDS and client access technologies
- * Microsoft Licensing
- * Mixed local and cloud SQL Server designs, future planning, managing big data, providing insight to data
- * More case studies on the usage of MDS & DQS
- * RedGate
- * More PASS community members, less Microsoft
- * MS BI (SSAS / Excel BI) Product Team (Sharma, Mirchandani, etc.)
- * MS Program Managers
- * Multiple Microsoft SQL CAT speakers & Microsoft Program Managers for internal SQL Server Dev. Teams
- * PowerShell Gurus
- * Solutions that are "real world" and deal with less than best practice situations. How to work effectively to guide something poorly developed toward something closer to ideal.
- * SQL Server 2012 internals, troubleshooting, HADR solutions and AG
- * Pragmatic Works

Who would be your top speaker choices?

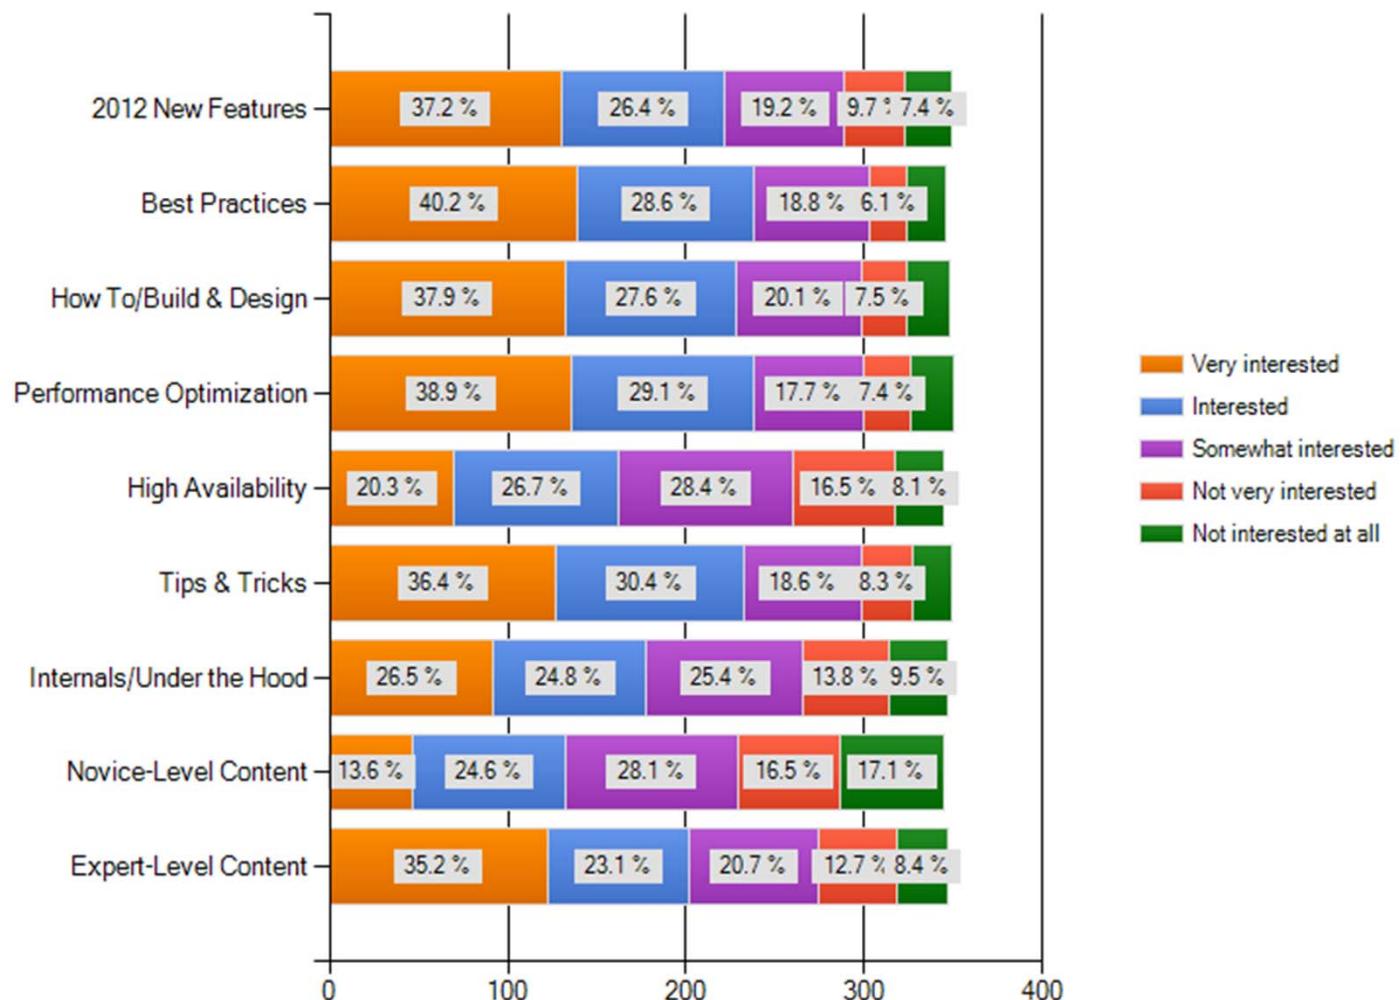

Application & Database Development Track

Cloud Application and Development Track
Please rate your interest in the following topics:

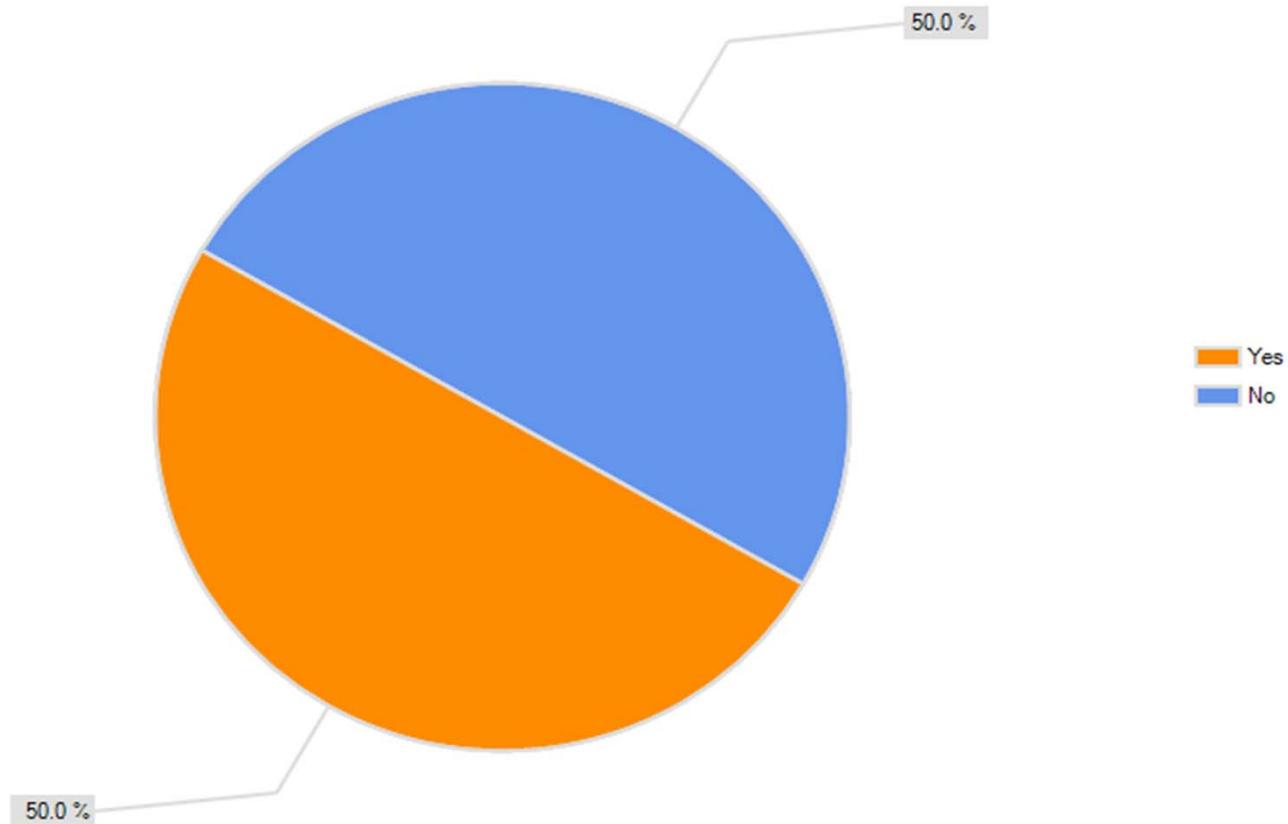

Professional Development Track
Please rate your interest in the following topics:

Would you be interested in the addition of
a Big Data and NoSQL track?

Additional thoughts and feedback – Top 10

1. Improve session room allocation
2. Improve scheduling of top speakers to ensure they aren't on at the same time and session topics don't overlap
3. Review and improve keynote content
4. More deep dive, expert-level sessions
5. More balance between novice, intermediate and advanced level sessions and ensure that topics are scheduled sequentially from novice to expert
6. Give more of a chance to new speakers
7. Provide all session decks well in advance of the session
8. Offer Birds of a Feather sessions based on industry
9. Ensure leveling of sessions is correct/warranted
10. Session suggestions: replication; hekaton; data tier architecture; high availability strategies/ architectural designs; MS licensing; automation; SQL MDS; replication; VM/HyperV; roadmap and mobile BI sessions; MS vs Tableau/Qlikview; more DBA/ less BI sessions; internals of SQL Server; US military specific topics; impact of PowerShell for the automation of SQL Server operations; data modeling tools and data dictionary; custom visualization; performance tuning; database unit testing; FastTrack; PDW; SharePoint; 2012 SQL Server new features; advanced replication; DB hosting with cloud providers.
